

Dear students,

should you be interested in pursuing a bachelor's or master's thesis within the field of architectural and housing sociology, we invite you to contact us. **Please note that the thesis is a scientific written work.** We recommend that you allow yourself sufficient time to plan your thesis, as this will enable us to offer you the most suitable supervision.

Should you wish to be supervised, please send us an informative proposal containing the following elements:

1. **Working title:** A concise title that outlines your research topic.
2. **Research Question:** A clear question that you want to address and want to write about.
3. **State of the Research:** A first overview of the current state of research, including relevant sources. Make sure you adhere to the scientific standards.
4. **Methodological Approach:** A description of the methods you plan to use in your thesis.
5. **Timeline:** A basic timeline of how you plan to complete your thesis.

At which point will I receive confirmation of supervision?

Once we have received your proposal, we will offer you a personal appointment in our office at the department to discuss any remaining questions you (and we) may have about your project. Only after this meeting will we be able to determine whether we are able to supervise your thesis.

We look forward to receiving your proposal!

Best regards

C. Hannemann
